# Harshit Sharma

+91 9150008502 | harshit0101s@gmail.com | LinkedIn-Harshit Sharma | Github | Portfolio

## Profile Summary

Final-year **B.Tech** student in **AI and Data Science** with a strong foundation in **software engineering**, emphasizing **clean architecture**, **scalable systems**, and **end-to-end application development**. Passionate about **designing reliable solutions** and writing **efficient, maintainable code**.

## Technical Skills

**Languages**: Python, C/C++, JAVA, JavaScript, HTML/CSS

**Frameworks & Libraries**: React.js, Node.js, Flask, TensorFlow, Keras

**Databases**: MongoDB, MySQL, PostgreSQL

**Tools**: Git, GitHub

**Domains**: Machine Learning, Deep Learning, REST APIs, Software Development

## Experience

**SDE Intern** May 2025 – July 2025
*PreludeSys* *Chennai, Tamil Nadu*

- Built and deployed a **scalable SkillSet Matrix platform** that streamlined employee skill tracking and reduced manual evaluation efforts by **40%**.
- Developed and secured a suite of **RESTful APIs** with role-based access control, enabling **real-time analytics** and improving decision-making speed by **30%**.
- Delivered **custom dashboards** for employees, managers, and admins, increasing visibility into skill gaps and improving feedback turnaround time by **2x**.

**Special Projects Intern (Remote)** May 2024 – July 2024
*Favcy Venture Builders* *Gurugram, Haryana*

- Collaborated on **AI-driven applications**, including a HIVE tool, a chatbot-integrated language learning platform, and a predictive astrology engine—showcased **25% higher engagement potential** and **35% faster response times** in internal testing and simulated environments.
- Authored multiple applied **AI research theses**, focusing on real-world deployments of intelligent systems in education, productivity, and consumer platforms.

## Project Work

**Expense Tracker Web Application** | *MongoDB, Express.js, React.js, Node.js*

- Designed a **full-stack** Expense Tracker application using the MERN stack with **secure JWT authentication**, enabling users to seamlessly manage incomes and expenses in **real-time** through an intuitive and responsive UI.
- **Developed modular, RESTful APIs and optimized** database interactions with MongoDB, ensuring scalable performance.

**Sarcasm Detection Using Fine-Tuned BERT** | *NLP, BERT, Keras*

- Built a **hybrid sarcasm classification model** by integrating **fine-tuned BERT embeddings** with handcrafted linguistic features.
- Extracted syntactic and sentiment-based features using **spaCy** and **TextBlob**, and optimized a **Keras-based classifier** using Keras Tuner.
- Attained an accuracy of **93.8%**, **outperforming baseline BERT-only and traditional ML models** on news headline data.

**Book Recommendation System** | *Flask, scikit-learn, Gunicorn*

- Built a scalable book recommendation system using **collaborative filtering.**
- Integrated a **responsive Flask API for frontend interaction** and scaled deployment via Gunicorn.

**News Popularity Prediction (2024 DataLab Cup)** | *Python, TensorFlow, GRU, TabNet*

- Developed a GRU-based deep learning model to predict news popularity using text features.
- Achieved an **AUC-ROC score of 0.5729** , improving upon baseline models.
- Applied **LDA topic modeling and TF-IDF** feature extraction for text preprocessing.

## Education

**Shiv Nadar University Chennai** CGPA: 8.03/10
*B.Tech. in Artificial Intelligence and Data Science* *Sep 2022 - July 2026*

***Courses:*** *DBMS, Operating Systems, Data Structures, Artificial Intelligence, Machine Learning Techniques, Deep Learning, Computer Networks, Data Analysis and Visualization*

## Certifications

- **Google Certified** – The Bits and Bytes of Computer Networking
- **Vanderbilt University** – Prompt Engineering for ChatGPT
- **NPTEL** – Social Networks and Analysis
- **NPTEL** – Introduction to Large Language Models (LLMs)
