Education

- **Indian Institute of Information Technology** — Jabalpur, India
  Bachelor of Technology in Computer Science and Engineering; GPA: 8.4 — *August 2023 - August 2027*
  Courses: *Data Structures, Analysis of Algorithms, Machine Learning, Databases , Operating Systems, Computer Networks,OOP.*

Projects

- **Fake News Detection App:**:
  - Built a cross-platform AI app to detect fake news, rumors, and media manipulation across social platforms in real time, handling 5K+ content checks per week.
  - Delivered verdicts (real, fake, needs review) with confidence scores using NLP, audio/image checks, and fact check APIs, achieving 87% precision on benchmark data.
  - Tech: React, FastAPI, MongoDB, BERT, RoBERTa, OpenCV, Librosa, Google Fact Check API, Flask chatbot.
- **Intelligent Video Surveillance System**:
  - IVSS – Designed a full-stack multi-camera surveillance system with real-time motion detection, YOLO-based object detection, face recognition, and a Flask-based web dashboard for live monitoring and alerts..
  - Tech stack: Python, OpenCV, Flask, YOLO (Ultralytics), face recognition, SQLite, Bootstrap.
- **To-Do List App**:
  - Created an interactive and responsive task management app with features to create, delete, and organize custom task lists, enhancing productivity for more than 100 regular users.
  - Utilized Node.js, Express, JavaScript, EJS templating, HTML, and CSS to deliver a smooth user experience.
- **Flask Quote Generator App:**:
  - Engineered a minimalist Flask-based application that automatically generates and displays random motivational quotes, fulfilling over 1,000 monthly requests from users.
  - Built using Python, Flask, HTML, CSS, and Jinja2 templating for fast rendering and clean layout.

Skills Summary

- **Programming Languages**: Python, C , C++, JavaScript, SQL, html, Css ,JAVA
- **Frameworks**: NodeJS, ExpressJS, ReactJs , JQuery, MongoDb , Bootstrap ,Flask, Next.js, EJS.
- **Tools**: GIT, GitHub,VSCode.
- **Platforms**: Web, Windows , Linux.
- **Soft Skills**: Leadership, Event Management, Writing, Public Speaking, Creativity, Mentorship.
- **Languages**: Hindi (Native), English (Fluent), German, Japanese, Korean (Beginner)

Experience

Codess Cafe :
Selected for Codess.Cafe,a community-driven initiative empowering women in tech through mentorship, collaboration,and growth.

Harvard Aspire Leaders Program:
Awarded a place in the Aspire Leaders Program, a selective Harvard-leadership development program for students worldwide.

Shefi Scholar Season 14:
Awarded as a SheFi Scholar in a leading global Web3 program that empowers women through hands on learning in blockchain,AI

GSSoC Campus Ambassador and Contributor:
Chosen as GSSoC 2025 CA and Contributor-Advocated open source, tech education, and community learning in a 12-week progra

Infosys Pragati Cohort 25:
Nominated for Infosys Pragati – a 3.5-month hybrid program for women in leadership, career, and professional development.

Achievements

- Participated in the AlgoUniversity Graph camp and achieved a rank of 11 in the official contest .
- Selected for the 'Can You Hack It?' hackathon based on demonstrated coding proficiency, then leveraged key strategies to build a functional, multi-player game prototype in just 24 hours..
- Led preparation efforts for participation in ICPC mock Style contest named Code Rumble guiding a team of 3 .

Competitive Programming

- **Codeforces :**
  Codeforces: Completed 100+ ICPC style contest problems on Codeforces
- **Leetcode :**
  Leetcode: Solved around 400+ problems on leetcode.
- **HackerRank :**
  HackerRank: Achieved 5 stars for C++ language.
- Practiced around 700+ programming questions on platforms like Leetcode , Codeforces , codechef , hackerrank , GFG. .
